PROJECTS

Aviary | *Spring Boot, PostgreSQL, HTML/CSS/JS, Thymeleaf* — Live | GitHub

- Built an aircraft maintenance tracker by designing a **9-table PostgreSQL schema**, flagging service due dates
- Secured accounts by adding Spring Security, BCrypt, CSRF, and ownership checks to **block cross-account access**
- Wrote **96 tests** (35 JUnit, 61 Playwright); GitHub Actions tests branches and auto-deploys main to Heroku

Pit Stop | *Java 21, Spring Boot, React 19, PostgreSQL* — Live | GitHub | Capstone I

- Led a **5-person Scrum team** as **Product Owner** in Capstone I, running planning, reviews, and retrospectives
- Built a car maintenance tracker by scaffolding the Spring Boot backend with **stateless JWT auth** and BCrypt
- Delivered vehicle sharing and maintenance alerts on a **25-endpoint REST API**, writing **43 of 78 commits**

RapidAid | *AWS Amplify, Cognito, AppSync/DynamoDB, React, Gemini API* — Live | GitHub | ShellHacks 2025

- Shipped a disaster-relief app **in 36 hours** with a **4-person team** by auto-classifying aid requests via Gemini
- Hardened a Lambda by validating Gemini output against allowed categories, **defaulting bad replies to "Other"**
