PROJECTS

Aviary | *Java 21, Spring Boot, Spring Security, PostgreSQL, GitHub Actions* — Live | GitHub

- Built **REST APIs** in Spring Boot to create, update, reorder, and delete maintenance items and flight logs
- Built an aircraft maintenance tracker by designing a **9-table PostgreSQL schema**, flagging service due dates
- Secured accounts by adding Spring Security, BCrypt, CSRF, and ownership checks to **block cross-account access**
- Set up **GitHub Actions CI/CD**: feature branches run JUnit tests; merged PRs **deploy to Heroku**

Pit Stop | *Java 21, Spring Boot, React 19, PostgreSQL* — Live | GitHub | Capstone I

- Led a **5-person Scrum team** as **Product Owner** in Capstone I, running planning, reviews, and retrospectives
- Delivered vehicle sharing and maintenance alerts on a **25-endpoint REST API**, writing **43 of 78 commits**
- Secured the API with **Spring Security** and **JWT authentication**, building the login endpoint and security config
- Built **full-stack features** in **React** and Spring Boot, then made the app deployable to **Heroku**

Deadhead | *Java 21, Spring Boot, PostgreSQL, Anthropic API* — Live | GitHub

- Built a **REST API** that turns an uploaded calendar into the cheapest weekly plan using **Dijkstra's algorithm**
- Integrated the **Anthropic API** to parse calendar events into trips, with a fallback matching **85k airport codes**
- Saved each pilot's flights and settings in a **PostgreSQL database** so data persists across sessions
